HR Cloud Transformation: Harnessing AI for Career Pathing and Growth

Bank of Hawai'i set out on an ambitious journey to transform their employee experience by harnessing Oracle's AI-powered Talent Management capabilities that empowers the workforce to actively shape their career paths and growth. This shift marked a significant evolution, moving away from outdated, manual HR processes to a dynamic, strategic HR model that partners directly with the business to drive long-term success. By leveraging Oracle's innovation, Bank of Hawai'i is not just enhancing their career development process, but also fostering a future-ready workforce that thrives on personalized, data-driven insights.

Join us to hear Susan Thoemmes, SVP of HR Technology at Bank of Hawai'i, *discuss the obstacles they overcame, the transformations on the horizon, and building a strategy to become a skills-focused organization with transformative cross-talent functions using Oracle Cloud HCM and their partnership with Argano to help them improve management decision-making, revitalize the employee experience, and better scale the business.*

A Deep Dive into the Bank of Hawai'i move to Oracle Cloud HCM

Learn more about how Bank of Hawai'i switched from legacy on-premises HCM solutions to the cloud for human capital management, including for Core HR, Payroll, Benefits, Absence Management, Time and Labor, Recruiting, Onboarding, Learning, and Talent Management.

Understand the approach Bank of Hawai'i took to employee career development, using the tools in cloud HCM, building job architectures, mapping skills needed to jobs, and putting in place a 9-box review process with employees. Also get a view into how the HR department acted as a strategic partner in this process, facilitating conversations and empowering functional departments to lead the employee development process.

Explore How Traditional & Generative AI embedded in Oracle CX Applications Boost & Transform Key Business Outcomes

Join Argano as we explore how Oracle CX applications (CPQ, Commerce, Subscription Management, Field Service, Sales & Service Cloud, and Incentive Compensation) can help your organization move forward faster and transform key business outcomes by optimizing various end-to-end processes. In this session, we will focus on:

- The unique challenges around sales
- Customer service, B2B commerce
- Integrating with ERP (on-prem or cloud)
- A variety of other customer experience issues we've solved using Revenue Transformation and Service Automation strategies

Learn how to leverage advanced Machine Learning and AI capabilities to enable smarter decision-making in today's evolving environment.
